

Munir Ayub Mohammed

Full-Stack Software Engineer | TypeScript & AI Integration

Addis Ababa, Ethiopia | 0907806267 | munirayub011@gmail.com | portfolio.ethio-viral.com

PROFESSIONAL SUMMARY

Software professional and tech entrepreneur with hands-on experience building production-grade applications across fintech, government services, and AI-powered platforms. Specialized in TypeScript and AI-driven development workflows, with a track record of delivering complete digital products — from architecture to deployment — in remote and self-directed environments.

TECHNICAL SKILLS

Languages: TypeScript (Expert), JavaScript (ES6+), Python

Frameworks: React, Next.js, Node.js, Express

AI & Automation: Prompt Engineering (Image/Video), AI Model Training Workflows, Telegram Bot Development

Specialized: OCR Technology, QR Code Integration, Fintech Dashboards, UI/UX Design (Figma)

Tools: Git/GitHub, System Administration, Digital Payment Systems

KEY TECHNICAL PROJECTS

Lead Developer | ShegerPay — Fintech Platform

- Architected the full platform from scratch, including a merchant dashboard for tracking revenue trends and transaction success rates.
- Designed a modern glassmorphic interface with dark mode support, built to establish high-trust aesthetics for financial users.
- Integrated multi-provider payment gateways including CBE Birr and Telebirr, with live ETB/USD currency conversion.

Full-Stack Developer | Ethio Viral

- Built a social media content platform that uses AI for image and video generation at scale.
- Engineered high-fidelity AI prompts to automate creative asset production, cutting manual production time significantly.

Lead Developer | Vehicle Inspection & OCR Systems

- Built a remote vehicle inspection system for the Ethiopian Transportation Bureau using USB camera feeds and OCR processing.
- Developed a payment verification tool for Telebirr and CBE that cross-references screenshot data against QR codes using OCR.

Founder & Developer | Gey-Link Portal

- Built a digital service portal for the Harari regional government featuring appointment scheduling and automated payment flows.
- Incorporated cultural Harari design elements into the UI, creating a product that felt native to the community it serves.

PROFESSIONAL EXPERIENCE

Digital Projects Developer | Remote / Part-time

- Deployed multiple Telegram bots and mobile applications addressing local community needs.
- Managed digital communities and delivered education on Forex and Cryptocurrency trading.

Business & Operations Manager | Hotel & Family Businesses

- Ran daily operations across hotel and family-owned businesses, managing staff, guest services, and vendor relationships.
- Developed revenue growth strategies and actively managed sales channels to improve business performance.

EDUCATION

Lucee College, Addis Ababa — Currently in 4th Year (B.Sc. Track)

Haramaya University & Aksum University — Prior technical coursework
